GHOST COURIER

This week I thought I would write about the new premier of the U.S.S.R and how the change would effect the relations with Canada, United States and China. Well as far as Canada is concerned the relations will not change much, I don't know to much about Can.-Ussr relat., but with the U.S. it is my assumption that we are in for another arms race, Especially since the Ussr is trying to open relations with China, because China has Nuclear weapons, besides which they also have superior manpower to date over any other nation. On the latest news the Ussr premier was upset with Mr. Reagan about the MX missile program and commented that he was not going to try and talk them out of it but that he has a counter project that was being worked on, also he stated that he is going to be much tougher than Brezhnev was.

All this means to me that there is another arms race on the way. Right now the Ussr is ahead of the states and other countries in every field of the military. The states have a couple of more sophisticated weapons than the Soviet Union but the S.U. has a greater number of weapons totally.

Have a Good Day.

TALK in the SLEEP

In the course of my stay here in bowden I found that a great many people talk in there sleep. It's all in the sub-conscious which means that the person had something on his mind but did not get a chance to talk about it. So it being kept in his head he unconsciously talks while asleep.

Here are some of the better ones I've heard
run across-

" This place pisses me off "

" Right, catch you later "

" . . . No...No, I wanna go..."

" I'LL KILL YA, I WILL "

" Here boy!, come on fetch..."

Well I guess different people think different things, (another brilliant deduction), but some of these people definitely should try to talk about the problems during the day so they don't accidentally get in trouble at night, (you never know who might walk by).

BOOK REVIEW

by Randall M.

I just finished reading one of the most scarriest books written in my time, scary because of the fact that what goes on can happen anywhere, anytime, even here in prison. The book starts off with a vacationing family in France and while at a friends, the vacationing parents daughter befriends a dog that is supposed to be drowned. When the family leaves to go back to England, the girl smuggles the dog with her. Unknown to her parents until they get back home. The deg gets away which starts a epidemic of rabies, at the same time there is corruption amidst the govt. offices which involves the man who was on vacation with his family. His daughter catches the disease from the escaped dog and dies days later. The rest of the book turns a communities life, plus the rest of England into a chaotic nightmare which affects everyone. This book is gauranteed to be good reading.
