The Ghost Courier

Oct. 29/82 X

Some bad news this week guys, the Canadian penal system isn't bad enough for some govt. officials. They want to bring back the death penalty for people who draw heavy time for very violent crimes. They would also like to establish the death penalty for rioters like those at Archaumbault.

Texas Horror

No it's not another ~~chadras massacre~~, this deals with the prison systems in Texas and other states. The article in LIFE magazine told how the prisons were a cruel and inhuman place to do time in. In one such place an inmate had to kill the captain of the guards and the warden to save his own life. This incident brought to light the scenes that went on in these places.

Now in 31 states the prisons have been thoroughly checked out and operate under new management or the scrutiny of the federal govt. The convict, which killed the warden and captain, received a 11-1 jury decision, so he has to go back court until he is found innocent or guilty. The jurer who held out against him said she just doesn't believe his story. Her husband is a cop.

## BOOK REVIEW

Cujo is the only book that blends reality and some superstition that keeps you in suspense all the way thru the book, that I've read. It's about a city's family move to the small country town and the nightmares that follow. It also deals with the country's towns real terror that can happen in any place on the map of the world.

Cujo is a good novel to read and pass some time, it is in the library under suspense, Cujo is by:

Stephen King.

### What's This

Inmates have asked me time and time again, why? Why does one inmate SERVING 5 years get pass after pass and other inmates serving 2 and 3 year sentences get nothing. Could it be that one inmate is using up all available escorts? Could it be that one inmate is better than the rest of us.

Who wouldn't like to have more than two dozen passes, escorted, when they go up for their, earliest, parole date? I would like to have just one...

### Now Snappy Answers to Stupid Questions

Don't you hate when someone asks you a stupid question? Well for a common one here's a snappy answer.

If someone asks:

Are you awake, retort with:

No dead leave the flowers and get out!

or

No I'm asleep and having a nightmare about someone asking me if I'M awake.

Cruising ?

### Participation

I need more people to give me material to put in the paper or you will continue to get a 3 or 4,5 page paper. Guys come up to me and say are we going to get a good paper this week, well thats ~~spoke~~ depends on the participation of the population. If I get more articles to put in the paper then the, more interesting, ~~and~~ longer paper is born.

### Lights in Unit 1

Why, on some mornings, do the L.U's turn the lights on in the dorms, and some mornings not. I think they should try to decide what the routine is going to be, but keep it steady.

I am hearing nothing but complaints about the lights getting turned on ~~ix~~ at 7:30. I will bring this up at the range meeting today at, I think, 2:00.
